The Blue Column is money brought in by coding diagnoses.

The red column is money brought in by auditing the Oasis and suggestions given to increase functional and clinical casemix grouping d/t improper marking of Oasis M questions. My Bill for this client was \$600.00. Even if the coder you use could find every diagnosis Home Health Coding Solutions found they aren't cross trained to audit the Oasis and look for functional and clinical discrepancies. I Paid for my own services in the \$966.13 Oasis audit money I found. I brought in an extra \$366.13 for your agency and saved time and money by not having you pay your RN's or coder in the office the time to code and your clinical coordinator the time to audit the Oasis.
